

For the first time in 17 years, the ECOC is once again taking place in Switzerland:

37th European Conference and Exhibition on Optical Communication Palexpo, Geneva:

State of the Art in Optical Communication

18 – 22 September – conference
19 – 21 September – exhibition

ECOC is Europe's largest conference in the area of optical communication with an accompanying exhibition. This conference is well-known as the *trouville* for the latest scientific work and trend-setting innovations in industry, technology and science.

Some programme highlights:

- 350 presentations in parallel sessions
- Various symposiums
- Workshops
- Tutorials

Special day ticket for the «Industrial-Day»
Tuesday, 20 September:

«The Swiss way of fibres to the home (FTTH)»

There is no shorter way to expertise!
Benefit from this special opportunity to meet experts from all over the world and exchange views.
